## Tusitawi Features and Benefits

### International and Local Digital Content

Approved textbooks and **thousands** of premium international and national resources including: textbooks, games, audio, video, interactive worksheets and practice tests.

### Guided learning

Guided learning for all three terms in math and science. Additional guided learning under development for many subjects. For schools, guided learning can be customized by teachers.

### National Exam Preparation

Interactive revision materials and past papers help students prepare for national exams.

### Meets or Exceeds Curriculum Requirements

For Ministry of Education\*, Private Schools, Religious Organizations and Home Schooling; Tusitawi, with its rich content and support for CBE learning approach, helps your child or classroom **flourish !**

*\* Includes the new Kenyan curriculum (2-6-6-3) for Early Years Education (Nursery to Grade 3) and the standard Kenyan Curriculum (8-4-4) for Standard 4 through Form 4*

### Learning Intelligence

Guided learning based on stated goals, teacher and artificial intelligence monitoring, evaluation assistance and recommendations.

Learning for  
Humanity

Tusitawi!  
...Let Us Flourish!

## Tusitawi: your child's digital classroom

## WHO WE ARE

Learning for Humanity (L4H) is a Canadian-based global corporation with offices in Kenya, Zambia and Zimbabwe.

## WHAT WE DO

L4H provides 1st class, affordable, leading-edge learning systems for home and school, globally. Our e-Learning Platform, named Tusitawi (Kiswahili for "Let Us Flourish"), supports Competency-Based Education (CBE), and is constantly updated by Kenyan educators, backed by a global education community, to keep Tusitawi current and effective.

## CONTENT

Our library of multimedia resources includes content from Kenyan publishers, from other African publishers, and from around the world. This content has been carefully curated and packaged for the Kenyan education context, following the national curriculum.

## FOR SCHOOLS

Learning for Humanity provides Tusitawi for schools as Tusitawi Managed Service (TMS). TMS can be 100% internet-based, but most schools choose to have our high-speed reliable media servers placed directly in the school so that the internet is not required\*. TMS is customizable by administrators and teachers so that educational and organizational school objectives are accelerated.

**\*Tusitawi for schools does not require internet, keeping students safe and secure while providing the ultimate in performance, reliability and cost savings.**

## BENEFITS

- ✓ TMS is a one stop total education package: equipment (optional), content resources, software, teacher training and technical support
- ✓ Cost-effective digital resources save money; no need to buy books and then abandon them in a year
- ✓ Decreases teacher prep time by giving easy access to curated, superior resources, supporting teachers to go deeper and/or deliver additional **Competency-Based Education** initiatives in a standard classroom time frame
- ✓ Increases class time effectiveness by allowing students to work at own pace in the classroom and at home: those who are advanced can go deeper in areas of interest; those who require remedial help can access revision materials
- ✓ Parents and students can access Tusitawi at home, helping to reinforce learning seamlessly
- ✓ More effective content retention through more effective tools such as video and interactive simulations
- ✓ Jump starts early years literacy and numeracy skills
- ✓ Increases overall marks and national exam results

**"Some of us are about to approach our national exams and this has become very handy for us"**

**- Bibian, Standard 8 student**

## COMPUTING SYSTEMS

We provide low-cost, reliable computers, televisions, projectors, laptops and tablets to ensure that your school receives the most access to technology within your budget.
